

WHAT WE DO

WIRELESS CONNECTIVITY

Comtel provides Wireless Connectivity where clients don't have Access to Fibre.

Clients who have Fibre can use Comtel's Wireless as failover for redundancy.

We cover most of the greater Cape Town and CBD, West Coast, and Johannesburg / surrounding areas. Comtel continually expands the network and uses the latest wireless technologies available.

COMTEL INSTALLS & MANAGES:

- Fibre Network that connects all the required services including:
- Telephony & PBX
- Internet & Hotspot
- DSTV
- Intercom / Access Control
- Building Services
- Main DSTV Dish & Head-end Equipment
- Intercom / Access Control
- Backhaul Link between the Multi-Tenant Environment & Comtel's Data Centre
- Comtel is an official Systems Integrator for Multichoice DSTV over Fibre Network

Comtel's Fibre Network ensures all current and future media and technological advances are supported.

COMTEL IS AN
OFFICIAL SYSTEMS
INTEGRATOR FOR

FIBRE CONNECTIVITY

In today's world there is an ever increasing demand to be connected ... and as we move into the future 'our time' is a precious commodity, so speed and reliability is critical!

Comtel provides high speed Fibre Connectivity to future proof all requirements.

CONVERGED FIBRE NETWORKS

Comtel installs Fibre Networks into the following environments:

- Apartment Blocks
- Residential Estates
- Residential Neighbourhoods
- Office Parks
- Office Blocks

Comtel manages an 'Open Access Policy' so clients can choose their Service Provider ... everyone has a choice!

TELEPHONY

Comtel provides telephone solutions to Residential and Business Users.

UNLIMITED CALLING

Comtel provides unlimited calling options to clients who prefer paying a fixed rate per month.

This 'Fixed Line' product is designed for both Residential and Business clients.

As the name suggests, clients are able to make as many calls during the month at a fixed cost.

Uncapped Internet has been here for a few years ... we now have 'Unlimited Calling'.
